### NEW AT ADIPEC

**OFFSHORE & MARINE**

New to ADIPEC this year is a dedicated Offshore, Marine and Heavy Equipment Zone, the first of its kind in the region. The new exhibition area will allow companies to showcase offshore products, services, and solutions — from rigs and vessels, to subsea drilling equipment, pipelines, and tools for reservoir production and mapping — in an actual marine environment.

Located in a purpose-built zone on the waterfront at ADNEC, the new exhibition space will be complemented by a dedicated Offshore & Marine Conference, running from 9 – 11 November of ADIPEC 2015, and where industry leaders will have an opportunity to share valuable offshore oil and gas knowledge and information.

### POLARIS RAFFLE DRAW!

**DON’T MISS YOUR CHANCE TO WIN A BRAND NEW POLARIS BIKE IN THIS RAFFLE DRAW**

**WHERE:** OFFSHORE, MARINE & HEAVY EQUIPMENT SECTION

**WHEN:** EVERYDAY OF ADIPEC AT 4PM

Visitors can win 4 Polaris Bikes during the exhibition.

Every day at 16:30 a winner will be chosen and announced at the new Offshore, Marine & Heavy Equipment Area.

**HOW TO ENTER**

To enter the raffle, simply fill out a coupon in your copy of the ADIPEC Daily, distributed across the show for all four days, and take it to the new Offshore, Marine & Heavy Equipment section in Hall 15 on the waterfront at ADNEC during the show.

- HSE
Under the Patronage of His Excellency Sheikh Nahyan Bin Mubarak Al Nahyan, Minister of Culture, Youth and Community, Young ADIPEC offers students from schools across Abu Dhabi an exciting line-up of events designed to encourage them to choose a career path into the oil and gas industry.

The Young ADIPEC initiative provides Abu Dhabi students from the ages of 14 to 17 with the opportunity to gain hands-on experience in the energy sector through a series of educational and engaging activities. Students are given numerous different platforms and media through which to learn and enhance their on-site experience, including a photography competition, sustainability zone, field trips to leading oil and gas companies, live demonstrations and the chance to learn about the key engineering design processes involved in the oil and gas industry.

8:30 – 15:00 Daily For Students - Hall 14

In 2013, ADIPEC hosted the first ‘Women In Industry: A Journey to Leadership’ evening, an event that took a close look at the lives and careers of 3 international women in the oil and gas sector.

In 2014, ADIPEC celebrated its 30th Anniversary and the second edition of Women In Industry which explored the role of women in oil and gas from 1984 (the year ADIPEC was launched) and fast forwarded a further 30 years to 2044 to gain insight into how the role of women in the sector might evolve.

In 2015, ADIPEC continues to develop Women In Industry initiatives reaching out to an increased number of women, encouraging them to build upon their career choices to achieve their maximum potential.

Hosted under the patronage of Her Excellency Sheikh Lubna Al Qasimi, Minister of International Cooperation and Development, UAE and NEW for 2015, Women In Industry expands into a full one day gathering on Sunday 8 November for both women and men, with the aim of embracing the drive to engage women in the growth and future success of the oil and gas sector.

BOOK NOW

HURRY - LAST CHANCE TO EXHIBIT AND SPONSOR

While 99% of the space at ADIPEC is now sold out, there are a few spaces left for exhibitors keen to make an impact at this crucial event.
Space is still available in the outdoor section, for manufacturers and suppliers of oil and gas equipment, machinery and vehicles.
The new Hall 15 has been created to meet the rapidly expanding demand for offshore and marine operators.
Exhibitors keen on attending in 2015 may also like to join the ADIPEC.

For more information, and to check availability, contact
Salman Abou Hamzeh
Email: adipec.sales@dmgeventsme.com
Or call: +971 2 444 4909

SPONSORSHIP
While stand space is nearly sold out, there are also a few limited event sponsorship opportunities left, which bring high profile brand exposure, exclusive sponsor-only networking opportunities and ultimately, the chance to bring greater footfall to your exhibition stand.

REASONS TO SPONSOR IN 2015
• Brand exposure to over 85,000 attendees
• Niche sponsorship opportunities for your sector
• 56% of attendees in 2014 had sole or joint purchasing power
• 62% of attendees are management level or above

Contact Nick Ornstein 971 (0) 2 6970510 or email: nickornstein@dmgeventsme.com
The Abu Dhabi International Petroleum Exhibition and Conference (ADIPEC), taking place from 9 – 12 November 2015 at ADNEC, is the world’s new meeting point for Oil & Gas professionals. Held in the capital city of the UAE, Abu Dhabi is a natural crossroads between East and West, and is fast becoming one of the world’s most influential energy hubs of the 21st century.

Following the success of the inaugural ADIPEC Golf Day in 2014, the 2015 Golf Day will once again provide a unique opportunity for key industry figures to network and engage in some friendly competition whilst playing at the luxurious Abu Dhabi Golf Club. Played in Texas scramble format, teams of four will compete for the honour of becoming ADIPEC Golf Champions and will enjoy 18 holes on a PGA Tour Championship Course, combining business with pleasure.

www.adipecgolf

The Middle East Petroleum Club (MEPC) is an exclusive membership club, providing a secure environment and senior network of contacts for key decision-makers in the oil & gas industry; engaging with one another on-site at ADIPEC and at MEPC events throughout the year.

The MEPC provides an exclusive gateway to high level networking and business opportunities, offering an environment for top-level industry managers and business leaders to connect with peers, friends and colleagues in a discreet and private setting.

Its primary objective is to strengthen the networks that exist between oil and gas executives across the region and forge new connections.

At ADIPEC, the MEPC exclusive lounge offers comfortable facilities and five-star cuisine in a discreet setting that provides an ideal location for industry decision makers to exchange ideas, discuss strategies and explore business opportunities.

Membership benefits include high level networking, ADIPEC access, guest access to the MEPC at ADIPEC, pre-registration for ADIPEC, VIP Parking, attendance to Al Multaqa, and much more.

Pipeline Magazine & ADIPEC Show Daily:

- The ONLY OFFICIAL publications of ADIPEC 2015 - the world’s 2nd largest Oil & Gas Event
- The largest BPA audited monthly Oil & Gas circulation in the Middle East
- The ONLY publications inserted into all delegate bags at ADIPEC 2015
- The ONLY publications with complete distribution across the whole venue including all major hotels in Abu Dhabi
- EXCLUSIVE distribution to ADNOC group of companies

Advertise with the only official publications that works with ADIPEC and guarantee you reach the ADIPEC audience

ADIPEC 2015 OPENING CEREMONY

**KEYNOTE ADDRESS – DR DANIEL YERGIN**

**10:30 MONDAY 9 NOVEMBER 2015 CONFERENCE HALL A**

Dr. Daniel Yergin, Pulitzer Prize winning author, is respected around the world as a leading authority and adviser on energy, international politics and economics.

Time Magazine said, “If there is one man whose opinion matters more than any other on global energy markets – it’s Daniel Yergin

Dr. Yergin is Vice Chairman of IHS, the global research and information company that works with the oil and gas industry worldwide. He is founder of IHS Cambridge Energy Research Associates. In 2014, he received a Lifetime Achievement Award from the Prime Minister of India.

Dr. Yergin received the Pulitzer Prize for his book The Prize, which was a number one best seller and made into a global television series and which is known throughout the oil world.

In 2015, Bloomberg ranked The Prize as the number one book on oil.

Dr. Yergin is the author of the new bestseller The Quest: Energy, Security, and the Remaking of the Modern World. The Quest has been called “a masterly piece of work” by The Economist and “a triumph” by the Financial Times. The New York Times said it is “necessary reading for C.E.O.’s, conservationists, lawmakers, generals, spies, tech geeks, thriller writers,” among many others. The Quest covers the history of energy, from oil and gas to solar and wind and outlines where we are today and what the future of energy, and our world, might look like.

**KEY AREAS UNDER DISCUSSION:**

**CEO PANEL WILL FOCUS UPON THE INDUSTRY FROM BOTH GOVERNMENT AND OPERATOR PERSPECTIVES**

- Production, capacity, investment
- Oil market stability
- Technology and innovation

The global challenge facing the oil and gas industry is to meet the ever-increasing energy demands of a dynamic and fast changing world in a sustainable and responsible manner. Clearly “business as usual” will not be enough to meet these demands. Innovation in products, services and processes holds the key to achieving safe, reliable, cost efficient energy solutions that also achieve economic, social and environmental sustainability targets. In this high level session, international industry leaders will share their strategies to address the challenges presented by the new energy landscape and the key roles played by innovation and the desire for sustainability.

**Moderator:**

His Excellency Suhail Mohamed Al Mazrouei, Minister of Energy, UAE will be joined by international and regional Ministers of Energy, Oil and Gas creating an interactive and open dialogue

Moderated by: Dr Daniel Yergin

**ADCIPE 2015 MINISTERIAL & CEO PANEL**

**09:00 TUESDAY 10 NOVEMBER 2015 CONFERENCE HALL A**

**MODERATED BY HIS EXCELLENCY SUHAIL MOHAMMED AL MAZROUEI, MINISTER OF ENERGY, UAE, THE MINISTERIAL AND CEO PANEL WILL FOCUS UPON THE INDUSTRY FROM BOTH GOVERNMENT AND OPERATOR PERSPECTIVES**

**KEY AREAS UNDER DISCUSSION:**

- Global energy outlooks
- Oil market stability
- Production, capacity, investment
- Technology and innovation

**Moderator:**

**Speakers include**

- Nima Abu Wardeh
  - BBC World
- Patrick Pouyanné
  - Total
- Jack P. Williams
  - ExxonMobil Corporation
- Maarten Wetselaar
  - Shell Integrated Gas
- Bernard J. Duroc-Danner
  - Weatherford International plc
- Lamar McKay
  - Chief Executive, Upstream BP
- Abdul Munim Saif Al Kindy
  - ADCO
- Lars Christian Rasmus Sorensen
  - Statoil
- Bill White
  - Mayor of Houston
It is now widely recognised that the world has sufficient oil and gas resources to satisfy future demand. However, recent speculation that the era of $100/barrel oil is over has underlined uncertainties in this supply/demand pattern that increase risks for the investor in an industry with long lead times and long pay-back periods. Moreover, the recent fluctuation in the oil price has increased near-term uncertainty for unconventionalists, which could cause producers to cut back on both supply and investment, leading to long-term consequences for the market. In addition, advances in technology, climate change considerations, and greater regulation of the energy mix are also on the horizon. These trends have already impacted the oil and gas sector, and could lead to its fundamental transformation.

This panel will debate key issues affecting today’s fast-changing global energy industry, examining the challenges and opportunities presented by the short-term fluctuation in the oil price and the role that public policy, unconventional, energy efficiency, and new advances in technology will play in the new energy mix. In addition, the panel will examine the desirable energy mix and transition pathways which will provide the world with affordable, secure, and increasingly lower-carbon energy.

Panel Session 2: Operations: The New Era of Operations Efficiency
09:00 Wednesday, 11 November 2015 - Hall A

The rapidly falling oil prices that affected the oil and gas world in the latter half of 2014 and early 2015 have forced the industry to reconsider many of its certainties, as it had benefitted from stable and high prices in recent years. Recent structural changes in the industry like a disproportionate increase in capital expenditure compared with operating cash flows, trends such as the US LTO revolution and other geopolitical factors complicating uncertainty in supply and demand, all point to an outlook of increased volatility. However, every challenge provides an opportunity, and here the industry needs to consider significant reshaping to how it works to give an ever-greater focus on efficiency.

This panel will examine how successful oil and gas organisations are seeking to enhance efficiency and assure the viability of their business models by taking actions on three operational fronts: 1. A stringent focus on reducing cash costs; 2. Bolstering capital delivery; 3. Leveraging data and technology to enhance efficiency and agility.

However, despite significant efforts, companies aiming to capture the above-mentioned efficiencies often fall short of their ambitions to have a sustainable, lasting impact. Operational transformations need to tackle not only ‘technical’ aspects but also ‘management infrastructure’ (KPIs, targets and monitoring ‘dashboards’ to ensure they can measure the aspired change) as well as mindsets and capabilities to address the underlying organisational culture. In conclusion, in these turbulent times the winners will be those who are able to shed their old ways of working to transform into truly agile, efficient and data-driven corporations while using technology to smartly tackle their biggest challenges.

Panel Session 3: People: CSR and the Future Energy Industry Workforce
11:00 Wednesday, 11 November 2015 - Hall A

The global energy industry is experiencing changes that radically redefine its future form and focus. It is under pressure to deliver increasingly diverse, environmentally sustainable and socio-politically acceptable energy solutions. In addition to the technological development that we have been witnessing in the last few decades, awareness of environmental and social impact has also grown considerably. And these have to do with “People”.

This panel session focuses on two key aspects that are critical to the success of the industry: Corporate Social Responsibility (CSR) and Human Capital.

Some decades ago, Corporate Social Responsibility was seen more as the voluntary initiative of the corporation to help and promote the welfare of its “external” stakeholders. This is no longer the case. Michael Hopkins, an expert on the matter, considers that CSR is concerned with treating the stakeholders of the firm ethically and in a responsible manner, creating higher standards of living for people within and outside the corporation, whilst preserving its profitability. Nowadays, CSR is mandatory and as a result, “In-Country Value” has become a standard component of every “operational agreement”. In fact, these concepts are now evolving to a more comprehensive and stringent: “Social License to Operate”.

Human Capital has always been seen as the most important asset of the firm. However, along with the technological development of the energy industry, the coming decades will demand flexible, innovative, agile leaders and staff from diverse professional backgrounds who can predict and proactively respond, in unconventional ways, to emerging industry trends. The ability to add local in-country value combined with the need to achieve sustainable market success will require both IOCs and NOCs to attract, retain, re-skill and deploy key professional staff, ensuring the right roles and skills mix, at the right time, and in the right quantity, to meet industry challenges.

This will drive the creation of new forms of ‘equal opportunity’ social contracts, development programmes and employment packages to equip and motivate a mobile, highly flexible, multi-skilled professional workforce who can confidently meet future performance requirements. These multirole/multi-discipline engineers and professionals will become a scarce, highly contended, global resource, and pose greater retention challenges for employers. Creating the ‘Future Energy Industry Workforce’ will demand greater integration with Academia to continuously review, update and adapt the curricula to the industry needs and create the required secondary/tertiary programmes.

Panel Chairs & Moderator:
Joaquin Pimentel
Middle East Representative
Partex

A. Salim-David Khemakhem
VP of Wild Operations

PANEL SESSION 4. HSE: NO COMPROMISES ON HSE & ASSET INTEGRITY, EVEN IN TOUGH TIMES

14:00 WEDNESDAY, 11 NOVEMBER 2015 - HALL A

It is expected that there will be pressure to optimise costs due to the impact of falling oil prices. Companies will seek to adapt to changing circumstances by reducing expenditures on non-core assets and programmes. Decision makers should carefully consider the long-term impact of their actions during these challenging times.

Accidents in the oil and gas industry can have severe negative impact on a company’s reputation and its operational and financial performance. Whenever people are injured, assets damaged, the environment polluted and business interrupted, money is unavoidably lost. Some incidents take years to recover from. Therefore direct and indirect costs need to be taken into consideration when making decisions on cost optimisation.

The current business environment presents a challenge to the industry but also presents an opportunity for companies to look deep within and streamline their processes and systems to maintain and enhance Health, Safety and Environment (HSE) in innovative ways without significantly impacting the bottom line. Now is the time to show our commitment to HSE and asset integrity. Where there is a will there is a way.

The theme of ADIPEC 2015 is “Innovation and Sustainability in a New Energy World” aimed at sharing best practices amongst organisations in a dynamic and challenging business environment. This HSE panel welcomes speakers to highlight their achievements in addressing the challenges mentioned above without compromising on HSE, and also to share their proven initiatives that have improved HSE commitment and performance.

Panel Chairs:

John Chisholm
Deputy CEO and General Manager
Schlumberger

Moderator:

Wafik B. Beydoun
Corporate HSEQ Manager
ADNOC

Speakers include:

Abdulrahman Barajjoo Al
Sakhi

Aly Mansoori
Corporate HSEQ Manager
ADNOC

Ray Rahman
Regional HSE Risk Engineering Manager, Occidental Oil & Gas Middle East Operations

Richard Brown
VP Health, Safety & Environment Schlumberger

David Nielsen
VP HSE/SSO Development and Production International STATOIL

PANEL SESSION 5. RESEARCH & DEVELOPMENT:
DRIVING INNOVATION THROUGH GLOBAL-LOCAL R&D PARTNERSHIPS

09:00 THURSDAY, 12 NOVEMBER 2015 - HALL A

To address new energy challenges, including the volatility in the oil price, the oil and gas industry is seeking to ramp up its innovative capacity through strategic R&D partnerships. The objective of this panel is to provide examples through case studies on how cultivating local, regional and international industry alliances, and connecting key people and organisations drive the growth of the innovation ecosystem—particularly locally.

With the increasing market demand for new technologies and knowledge, large companies who used to perform all R&D innovations on their own can no longer isolate themselves from the world. They are adapting and becoming more successful, like small innovative companies, by searching the right mix of closed versus open innovation paradigms.

The objective of this panel is to foster discussion among distinguished R&D/Technology leaders across the oil and gas industry and to have them share with us their ideas and experience on topics such as:

• Finding the right balance between (1) controlling ideas, intellectual property and rewards (closed innovation-type) and (2) sharing risk, costs, diversified and complementary skills (open innovation-type)
• Pros and cons of remote R&D centres working together versus a centralised centre
• Value of knowledge sharing between industry participants
• Case studies of successful joint R&D projects

Panel Chairs & Moderators:

Walk B. Beydoun
Manager Research & Development Division & Directorate Of ADNOC (UAE)

Martin Bremeier
General Manager
Wintershall

Speakers include:

Ginger Brotz
Vice President, Global Development
BASF Germany

Makoto Ichikawa
Executive Director and Member of the Board
INPEX

S. Gnana Pragasam
Catalyst Research Leader
Takreer

Daniel Polhey
Head of R&D Total

John Chisholm
CEO
Flotek Industries

PANEL SESSION 6. TECHNOLOGY & INNOVATION USING TECHNOLOGY AND INNOVATION TO ADDRESS INDUSTRY CHALLENGES

13:00 THURSDAY, 12 NOVEMBER 2015 - HALL A

Exploiting hydrocarbons from the deep reaches of the earth is no easy task. The level of technology and innovation required rivals that of any other high technology industry. It is well known in the industry today that most of the “easy oil” has been discovered and the task to produce more hydrocarbons is becoming more difficult.

The search for oil and gas has three objectives: to identify and evaluate hydrocarbon-bearing reservoirs; to bring hydrocarbons to the surface safely and cost-effectively, without harming the environment; and to maximise the return from each discovery. These objectives can be advanced only by ongoing research into the full cycle of the exploration, drilling, completion, and production processes in combination with an environmentally “green” solution plan.

The sources of technology destined for the oil and gas markets have changed over time. The era where oil and gas companies used to buy versus build new technologies has changed significantly throughout the last decades. Research is often conducted in partnership involving all stakeholders, i.e.: Operators, Service Companies and Academia, and it has become a global effort with varying partnership models around the world. This ensures close contact with leading-edge research in all relevant disciplines, improves understanding of regional challenges, and facilitates validation of research ideas with in-field experiments at an early stage in the product development cycle.

Even with the current environment of low oil prices, the projected global energy demand will increase when the global economy picks up speed again, and so it remains imperative to address the challenges facing our industry.

Technology and innovation are key elements for the sustainability of low cost per barrel developments of new oil and gas, conventional or unconventional reserves. All stakeholders will be in a stronger position when these challenges are tackled in broad cooperation at global, regional and local levels, to keep the source of sustainable cost effective hydrocarbon production on stream and to fuel the engines of the world in the years ahead.

Panel Chairs:

Hussain Fouad
El Ghazzawy
Vice President and General Manager

Dr Daniel Yergin, Pulitzer Prize winning author, is respected around the world as a leading authority and adviser on energy, international politics and economics. Time Magazine said, “If there is one man whose opinion matters more than any other on global energy markets – it’s Daniel Yergin”.

Energy, politics and economics

dr daniel yergin was vice chairman of ihs, the global research and information company that works with the oil and gas industry worldwide. He is founder of ihs Cambridge Energy Research Associates.

Pullitzer Prize winning author

dr yergin received the pulitzer prize for his book the prize, which was a number one best seller. In 2015, bloomberg ranked the prize as the number one book on oil.

Dr Yergin is the author of the new bestseller The Quest: Energy, Security, and the Remaking of the Modern World. The Quest has been called “a masterly piece of work” by The Economist and “a triumph” by the Financial Times. The Quest covers the history of energy, from oil and gas to solar and wind and outlines where we are today and what the future of energy, and our world, might look like.

At ADIPEC presents… Dr Daniel Yergin will through a moderated Q&A share insights into today’s global energy markets.

In 1964 the Guinness Book of Records described Sir Ranulph Fiennes as the World’s Greatest Living Explorer. Having led 22 expeditions around the world including both the North and South Poles, Mount Everest and the North Face of the Eiger, Sir Ranulph was awarded the Sultan of Oman’s Bravery Medal in 1970.

In 2003, after suffering a massive heart attack and a double bypass operation, Sir Ranulph was back in action just three and a half months later when he successfully ran 7 marathons on 7 continents in 7 days, raising over 15 million GBP for charity.

At ADIPEC presents… Sir Ranulph will draw on the analogy between nature’s sometimes harsh natural challenges and the very real day to day business challenges that Executives and Companies are facing and how the importance of building a team where the right character and attitude is of paramount importance and is vital for success.

Key areas will include how leadership, persistence, discipline, enthusiasm, creative thinking and innovation, planning skills, high organisational ability, flexibility to meet unexpected obstacles, goal setting and performing under extreme pressure – are all the qualities that are crucial to success in the business world.

Innovation Through Industry Collaborations: Energy, Aerospace and Medicine

Industry and technology are transforming at an incredible pace. As developments take shape, it is becoming more apparent that combining cross industry research and technology can only act to advance and enhance collaborative outcomes.

When it comes to energy, aerospace and medicine, what cross industry synergies can we expect to see taking shape in the next 5 – 10 years? And how soon can we expect the outputs to become commercially available and actively start benefitting each industry?

The ADIPEC 2015 Innovation through Industry Collaboration Briefing will feature experts in their fields showcasing their advances and collaborations.

Harnessing Africa’s Potential – Opportunities for Foreign Investors

With recent new oil and gas discoveries on the increase, Africa’s oil and gas sector is fast growing in strategic importance and catching the eye of potential foreign investors, IOCs and service and technology partners looking to do business in Africa. The opportunity and the potential are evident, especially in Africa’s oil and gas hot spots namely: Mozambique, Kenya, Tanzania, Angola, Ghana and Uganda. In addition, Nigeria, Morocco and Algeria all have up and coming opportunities for their oil and gas sectors.

With Africa actively open for business – topics in focus will include:

- Defining the opportunity: overview of Africa’s abundant energy reserves and how foreign investors can become partners and help shape the future direction of the sector
- How international investors and business leaders can actively engage with Africa’s NOCs and government officials to create mutually beneficial long lasting business partnerships
- What to expect? Gain clear understanding of Africa’s own expectations, objectives, their immediate needs and future predictions for their oil and gas sector

Join the discussion and gain insight into what Africa’s oil and gas sector has to offer.

Energy Investment – The Broader Perspective

The energy industry provides a wealth of opportunity for investors and companies looking to allocate their capital and invest in lucrative and exciting global energy projects.

Such investment opportunities allow for strategic diversification across energy portfolios and business activities whether that be from sovereign wealth funds, private equity investment or NOCs and IOCs.

Areas in discussion:
- Creating sustainable growth: why invest across sector and geography?
- Innovative investment approaches supporting the economy and industry: aerospace, clean energy, specialist healthcare and new industrial sectors
- Industry macro-economics and trends: understanding investment influences and sectors high of the investors agenda

ADIPEC presents… An Audience with… Jon Duschinsky

Jon Duschinsky is one of the world’s leading thinkers and speakers on social engagement, leadership and the future of business.

A global leader in marrying social profit with financial profit, from an early age, Duschinsky recognised that people are the most powerful force for driving change in this world. That recognition gave rise to a career dedicated to harnessing that power to activate causes around the world. One such cause was the global ‘ALS’ Ice Bucket Challenge that swept the world raising over US $30 million for motor neuron research.

To be profitable in business today, companies need to create an emotional connection with their consumer body, albeit public or trade end users of their product. With this in mind, Duschinsky is currently leading a global team of creative talent that brings fresh ideas designed to change the way people talk about issues, causes and brands.

In today’s world, consumers are savvier, more interlinked and more powerful than ever before. You can have the best products in the world but if you haven’t created a conversation around your brand, such that people trust you, they will not buy into what you are selling them.

At ADIPEC presents… Jon Duschinsky will draw on the areas of innovation, leadership and motivation and how you can actively create change and engagement within your business environment.
SUNDAY 8 NOVEMBER 2015 EASTERN MANGROVES RESORT & SPA

12:30 Executive Conversations: Building a talent pipeline to satisfy increasing demands in a new energy world
Currently, there is a worldwide shortfall of engineers, which can organize attractions women to the industry and make it a feasible career path:
- How to attract more women to the sector? Are we doing enough to 'excite' the next generation of young engineers to consider a career path in both renewable and hydrocarbon sectors?
- Strategies for retaining talent – making sure you have both work and personal goals
- Successfully incorporating a leadership programme designed for women
- Reshaping women’s skill sets and providing technical capabilities – which skills need to be developed further?
Moderator: Malek Fares, Business Presenter, SKY NEWS ARABIA

13:00 Networking lunch

AFTERNOON SESSIONS: WOMEN ONLY
14:00 Afternoon Opening Keynote Interview: ADIPEC 2015 presents: an interview with Sara Alkar
In this one to one interview Sara Alkar will share invaluable insights into her career and her journey to becoming the CEO and co-founder of Kuwait Energy, a multi-national, independent, oil and gas exploration and production company.
Career snapshots include:
- 1991: the only female on Kuwait’s Wild Well Killers team
- 2005: became CEO and co-founder of Kuwait Energy
- 2009: awarded for being the first and only woman leader in the Middle East oil and gas sector
Sara Alkar, CEO and co-founder, KUWAIT ENERGY

Q&A moderator: Eithne Treanor, Presenter, ADIPEC TV & E TREANOR MEDIA

14:30 Executive Conversations: Step by step guide to seizing your career path
- Choosing the right career path and advancing up the career ladder – where do you want to get to? And how can you get there?
- Taking on the challenge to change the way for women to enter the male-dominated boardroom
- How do you get on top of the agenda and make your voice heard?
- Transitioning from technical engineering to management. What do you need to know about making the transition into a leadership role?
- Will your engineering skills, hands on experience and expertise help?
- Making the most out of networking opportunities for career progression and knowledge sharing. Can joining a professional women’s network help?
- How to identify the right mentor for continued progression and support.
Moderator: Eithne Treanor, Presenter, ADIPEC TV & CEO, E TREANOR MEDIA

15:00 Roundtable Discussions – led by women for women

Roundtable topic:
- Leadership strategy - What skills and insight into what does and doesn’t work
Led by: Aseel Hamoudi, Vice President Talent and Capability Management, ABU DHABI GAS LIQUIFICATION COMPANY LIMITED (ADIGas)

Roundtable topic:
- Health, fitness and work balance: gaining a healthy lifestyle and understanding the importance of incorporating a manageable healthy lifestyle's fitness regime
Led by: Dr. Ghawaya Al Neyadi, Manager, Medical Services Division, ABU DHABI NATIONAL OIL COMPANY (ADNOC)

Roundtable topic:
- Work and family life balance: learning how to level the playing field and gain the perfect balance
Led by: Claudia Kromberg, Head of Development, WINTERSHALL

Roundtable topic:
- Overcoming cultural differences and barriers to success in the workplace
Led by: Dr Lyn Jeanette Nicks, Strategy and Coordination Directorate, ABU DHABI NATIONAL OIL COMPANY (ADNOC)

What can you expect?
Introduction to the roundtable leaders, followed by each lead outlining the topics, themes and expectations at each table.

Attendees are invited to attend and sit at the table with the topic of their choice. Attendees are free to remain at their chosen table or to move around the room and sit at other tables with topics of interest. Attendees are encouraged to share open conversations, ask questions and share experiences for a truly interactive and learning experience.

Following the conclusion of the roundtable discussions, the moderator and roundtable leaders reconvene on stage and share with the whole audience a snapshot of their table discussions and outcomes.

16:00 Afternoon tea and Arabic coffee with informal discussions in a traditional Majlis setting
Emiratis decor and modern flair
A fun, interactive and informal setting where attendees have the option to be served afternoon tea and Arabic coffee and participate within an informal discussion on ‘Women as brand Ambassadors’

Key Women as brand Ambassadors discussion elements include:
- Balancing personal and professional images
- Presenting yourself within a professional environment
- Building upon your reputation and projecting a positive impression
- Communication in the modern world: social media etiquette for women

17:00 Closing
Just 40 seats available – released on a first come first served basis!
NEW FOR 2015

OFFSHORE, MARINE & HEAVY EQUIPMENT ZONE

New to ADIPEC this year is a dedicated Offshore, Marine and Heavy Equipment Zone, the first of its kind in the region. The new exhibition area will allow companies to showcase offshore products, services, and solutions – from rigs and vessels, to subsea drilling equipment, pipelines, and tools for reservoir production and mapping – in an actual marine environment.

Located in a purpose-built zone on the waterfront at ADNEC, the new exhibition space will be complemented by a dedicated Offshore & Marine Conference, running from 9 - 11 November, and where industry leaders will have an opportunity to share valuable offshore oil and gas knowledge and information.

VISITOR REGISTRATION NOW OPEN www.adipec.com/visreg
CONFERENCE REGISTRATION NOW OPEN www.adipec.com/confreg

CONFIRMED EXHIBITORS INCLUDE:

[List of confirmed exhibitors]
VISIT THE NEW OFFSHORE, MARINE & HEAVY EQUIPMENT AREA

VISIT NOW!
This new exhibition area presents companies showcasing the latest offshore products, services, and solutions in an actual marine environment. Selection of confirmed exhibitors include, ADNOC, ADNAT-CO-NGSCO, ESNAAD, IRSHAD, NDC, Abu Dhabi Ports, Maersk Oil, Zakher Marine, Sparklet Engineers, Manuli Rubber, IRM Offshore, ELA Container, Safety Services Group, CCS, Albwardy Marine/Damen Shipyard Sharjah, Canadoil Group, Jindal Saw Limited, Horizon Geosciences to name a few.

SHIP TOURS

With offshore investment expecting to reach $25bn over the next 5 years, ADIPEC has launched a dedicated Offshore & Marine Conference in addition to the traditional ADIPEC Conference. The three-day ADIPEC Offshore and Marine Conference will showcase the entire value chain of offshore activities covering key offshore projects in the Middle East and globally. The Regional Rigowners Seminar organised by National Drilling Company and Det Norske Veritas follows on Thursday 12 November.
